NO

SIP Paging Unit
NS1163

SIP Extension Loud Ringer
NS1163

SIP Call Point System
NS1171

Visit northsupplyonline.com for more information
Our range of SIP endpoint and analogue extension LED strobe units that flash when a handset is called, are an ideal solution for loud, silent or hazardous areas.

The units are supplied with clear lens cover as standard or this can be interchanged with a blue, red or amber lens cap. Each design comprises 8 highly efficient and powerful LEDs to ensure calls can be clearly seen.

### Analogue Strobe Unit
**NS1166**
- **Dimensions**: 122x122x760 mm
- **Finish**: Plastic
- **Mount Style**: Surface
- **Light**: Selectable flash pattern, rate and intensity
- **Environment**: Weather resistant

### IP Strobe Unit
**NS1165**
- **Dimensions**: 122x122x760 mm
- **Finish**: Plastic
- **Mount Style**: Surface
- **Light**: Selectable flash pattern, rate and intensity
- **Environment**: Weather resistant
These functional loud ringers/paging units connect to a PBX via an analogue extension or SIP endpoint. This allows users to set the unit to make either a paging announcement from any handset on the telephone system or an extension loud ringer for use in noisy environments where the standard handset ring is not audible.

For environments where additional indication is required, the loud ringer/SIP paging unit can have a visual alerter unit connected. This will provide a green flashing indicator in sequence with the ringing.

### Analogue Loud Ringer/Paging Unit

**NS1164**

- **Dimensions**: 140x80x40 mm
- **Finish**: Plastic
- **Mount Style**: Surface
- **Sound**: Non-irritating tone output

### SIP Loud Ringer/Paging Unit

**NS1163**

- **Dimensions**: 160x102x55 mm
- **Finish**: Plastic
- **Mount Style**: Surface
- **Sound**: Non-irritating tone output

### Visual Alerter Upgrade

**NS1167**

This visual alert unit has been designed to extend Loud Ringer/Paging unit functionality.

- **Dimensions**: 90x65x20 mm/35x35 mm
SIP Call Point System

Audio Visual Endpoint Solutions

Our call point solution is designed for organisations where the ratio of staff to area is low. This solution allows call points to be strategically placed to allow customers to press the unit and call for assistance.

Once the call point unit is pressed, the controller will ring predetermined extensions on the telephone system and upon answering, the operator will be advised as to which call point was activated.

Call Point Unit
NS1171

- **Dimensions**: 155x110x45 mm
- **Finish**: Plastic
- **Mount Style**: Surface

Call Point Controller Unit
NS1169

This control unit is designed to enable SIP call point functionality

- **Dimensions**: 146x177x38 mm
